

YWAM.org Opportunities:

Back-End Web Developers

Our goal at ywam.org is to mobilize thousands more missionaries and to foster spiritual vitality and collaboration within our mission. To see this happen we need more back-end developers who can serve as part of our global virtual team. Would you consider joining us and helping to make a difference?

We are seeking individuals who can serve part or full-time and have the following skills:

- Ability to work as part of a global, virtual team.
- Fluency in one or many of the following languages (PHP, ASP.NET, C++, Java, Python, Ruby)
- Experience with OOP and MVC best practices
- Familiarity with database architecture and the related API's
- Experience with version control and content management systems (Git, WordPress)
- Experience with scaling web applications
- Aren't afraid of the command line
- Comfortable in an agile development environment

Additional familiarity and experience with the following would be helpful:

- HTML, CSS, JS
- WordPress API, plugin and theme development
- development tooling
- deployment management
- Design skills would be a bonus.

We are happy to consider “junior level” volunteers or interns. If you are interested in finding out more, please contact us at ywam.org@gmail.com
